I. Background

Purpose

Public services and facilities, such as fire protection, law enforcement, libraries, schools, and parks are amenities provided by the government to ensure the health, safety, and welfare of its residents. These services and facilities help to protect the population as a whole and contribute to community maintenance.

This Public Safety, Services and Facilities Element contains Goals and Policies outlining strategies to fulfill the overall mission of the County of Los Angeles: “to enrich lives through effective and caring service.” This Element identifies local hazards that include fire, geology, and floods, and then elaborates on community expectations for enhanced and efficient local services that include law enforcement, parks, schools, libraries, health facilities, and economic development.

Issues

Public services require long-range planning to account for anticipated population and environmental changes that necessitate modification of service levels. Fire and sheriff’s services must anticipate the extent and location of future needs to determine what enhancements can be offered. The provision of trails, parks, and roads requires coordination among multiple government agencies to achieve service goals. Schools, libraries and health services need to be accessible to the local residents they serve. A strong economic base ensures that all these public services and facilities can continue to be offered.

The level of public services and facilities are often dependent upon population numbers. Higher population numbers equate to higher demand, and thus larger communities receive greater quantities of service. The Antelope Valley is comprised of dispersed towns with smaller populations that correspond to relatively limited service availability, which underscores the necessity of long-range planning to ensure an adequate supply of life and safety services to maintain and enhance the quality of life.

Local environmental features, such as buttes, floodplains, and forests, make the Antelope Valley a uniquely rural setting in Los Angeles County but also give rise to many of the natural hazards that can compromise the safety of residents. Remote areas pose challenges to safety personnel trying to protect residents when responding to earthquake, flood and fire disasters. While many of these hazards are pre-existing and unpreventable, there are many actions that can be taken to reduce risks.

Vision and Strategy

The Area Plan’s Vision Statement requires this Element to provide quality social, education, and recreational services and facilities. To implement the Area Plan’s Rural Preservation Strategy, this Element will improve the quality of life and increase residents’ safety and well-being by guiding future development to rural town center areas, rural town areas, and economic opportunity areas where services are already provided or are being planned and which contain less hazardous portions of the

Antelope Valley. As changes occur in the future, Valley residents will continue to receive high-caliber public services that accommodate current and future needs.

II. Goals and Policies

Fire Hazards

Goal PS 1: Protection of the public through fire hazard planning and mitigation.

- Policy PS 1.1: Limit the amount of potential master-planned development in Very High Fire Hazard Severity Zones through appropriate land use designations with very low residential densities, as indicated in the Land Use Policy Map (Map 2.1) of this Area Plan.
- Policy PS 1.2: Require that all new developments provide sufficient access for emergency vehicles and sufficient evacuation routes for residents and animals.
- Policy PS 1.3: Promote fire prevention measures, such as brush clearance and the creation of defensible space, to reduce fire protection costs.
- Policy PS 1.4: Provide strict enforcement of the Fire Code and all Fire Department policies and regulations.

Geological Hazards

Goal PS 2: Protection of the public through geological hazard planning and mitigation.

- Policy PS 2.1: Limit the amount of potential development in Seismic Zones and along the San Andreas Fault and other fault traces, through appropriate land use designations with very low residential densities, as indicated in the Land Use Policy Map (Map 2.1) of this Area Plan.
- Policy PS 2.2: Limit the amount of development on steep slopes (Hillside Management Areas) and within landslide and liquefaction areas, through appropriate land use designations with very low residential densities, as indicated in the Land Use Policy Map (Map 2.1) of this Area Plan.
- Policy PS 2.3: Prohibit the construction of new structures on or across a fault trace.
- Policy PS 2.4: Ensure that new development does not cause or contribute to slope instability.

Flood Hazards

Goal PS 3: Protection of the public through flood hazard planning and mitigation.

- Policy PS 3.1: Limit the amount of potential development in Flood Zones designated by the Federal Emergency Management Agency through appropriate land use designations with very low residential densities, as indicated in the Land Use Policy Map (Map 2.1) of this Area Plan.
- Policy PS 3.2: Require onsite stormwater filtration in all new developments through use of appropriate measures, such as permeable surface coverage, permeable paving of parking and pedestrian areas, catch basins, and other low impact development strategies.
- Policy PS 3.3: Review the potential local and regional drainage impacts of all development proposals to minimize the need for new drainage structures.

- Policy PS 3.4: Ensure that new drainage structures are compatible with the surrounding environment by requiring materials and colors that are consistent with the natural landscape. Discourage concrete drainage structures.

Law Enforcement
